## **PREFACE**

For an informed management regime to ensure sustainability of the marine fisheries, it is essential not only to have reliable information on the status of marine fish resources along with fishing effort expended but also the number of fishing villages, landing centres, fisherfolk population, their occupation status, fishing crafts, fishing gears and other related parameters. With this objective, the Central Marine Fisheries Research Institute (CMFRI), Cochin has been conducting frame surveys at periodic intervals. Marine fisheries census on an all India basis was last conducted by CMFRI during May-July, 1980. Since the last census, the marine fisheries in India have witnessed both qualitative and quantitative changes. Post 1980 was also been a period where a number of management/policy interventions were made by the Government of India and the maritime states for ensuring sustainability, conservation of resources and to protect the interests of artisanal fishermen. Surely, the policies and interventions need to be reviewed and fine tuned in view of the highly dynamic nature of marine fisheries. For this a strong realtime and reliable database on various aspects of marine fisheries is essential. Recognising such a need, Department of Animal Husbandry, Dairying & Fisheries (DAHD&F), Ministry of Agriculture (MOA), Govt. of India, has taken up during the 10th Five Year Plan, a programme on Strengthening of Database and Information Networking for Indian Fisheries Sector in which Marine Fisheries Census is a major component. Recognising the expertise and experience of CMFRI in conducting such massive census surveys, the DAHD&F, MOA has entrusted the task of conducting the All India Marine Fisheries Census in the mainland to CMFRI.

Frame of the survey, namely, the marine fishing villages available with CMFRI was validated and updated with the latest information obtained from the respective maritime states. After identification of census parameters such as the population size, education, religion, occupation, number of crafts and number of gears etc., the necessary schedules were designed to collect information and these were approved by the Technical Monitoring Committee set up by DAHD&F, MOA.

The census was conducted in two phases with the first phase covering all the maritime states and Union Territories except Tamil Nadu and Pondicherry which were covered during second phase. The first phase was conducted during April-June, 2005 and the second during November- December, 2005. Over 300 CMFRI staff (Scientific and Technical) supervised the field level and zonal level census operations ensuring proper collection of relevant data. A total of 1492 field enumerators mostly drawn from the fishing communities/fishing villages covered 3202 marine fishing villages. After completion of the census in both the phases, the data were sent to headquarters for processing and preparation of reports. The software required for data entry, data validation and processing was developed by the scientists of Fishery Resources Assessment Division, CMFRI.

The final report (containing two parts) on the marine fisheries census on an All India basis with respective state summaries including the scope, census parameters, their definitions, the types of schedules and instructions for collection of data was released by Shri.P.M.A. Hakeem, I.A.S., Secretary, DAHD&F, Ministry of Agriculture, Govt. of India on 25 July 2006 at Krishi Bhavan, New Delhi.

The rapid census exercises and the information supplied by the state department resulted in the finalisation of 346 marine fishing villages spread over three districts of West Bengal. Conscious efforts were made to avoid villages that were estuarial and other inland fishery regions. Further in the villages only those households were selected where at least one member of the family was involved in marine fishing or allied activities. This publication (Part III of the Census report) summarises the districtwise census data of West Bengal covering a range of information right from the population bifurcation among West Bengal fisherfolk to the ownership pattern of different crafts, either full or partial. For a better understanding of the craft and gear ownership vis-à-vis occupational fishing, specially assorted information on number of households, which thrives by fishing without any wherewithal, has also been presented. Such incisive processing will be of much use to the planners and state authorities, whose primary objective is targeted towards the 'have-nots' of fishery. This report contains an exhaustive list of fishing villages of West Bengal along with their socio-occupational profile including the craft and gear infrastructure segregated sector-wise.

I take this opportunity to thank the DAHD&F and the Indian Council of Agricultural Research (ICAR) for entrusting CMFRI with this onerous responsibility, which has been completed within a reasonable time span. Special mention is required to laud the role played by CMFRI personnel especially Dr. G. Syda Rao, SIC, Visakhapatnam Regional Centre of CMFRI and the associated scientific and technical staff who made this venture a success with their dedicated and tireless efforts. I hope this report in this current shape and form will be of immense utility to the quintessential observer of Indian Marine Fishery.

## **SUMMARY**

Marine Fisheries Census 2005 was carried out in three districts of West Bengal namely Howrah, 24 Parganas(S) and Purba Midnapur during April-June 2005. The scope, time frame, the parameters, their definitions and types of schedules used are described in Part I and Part II of the Marine Fisheries Census Report. The salient features are summarised below:

- There were 346 marine fishing villages in West Bengal out of which 237 were in 24 Parganas(S), 85 in Purba Midnapur and the remaining 24 were in Howrah district.
- The total number of fishermen households was 53,816 of which 81% were in 24 Parganas(S) district, 15% in Purba Midnapur and 4% in Howrah district.
- Marine fishermen population in West Bengal was 269,565. Adult male constituted 32%, adult females 29% and children 39% of the population. Average population per village was 779 and the average family size was 5. Fishermen concentration was higher in 24 Parganas(S) district followed by Purba Midnapur and Howrah. Female to male ratio was 898 for 1000 males.
- In West Bengal 31% of the fishermen possessed primary level of education, 13% secondary level and 2% possessed above secondary level of education. About 54% of the fishermen population has no formal education. Nearly 54% of the marine fisherfolk in Purba Midnapur district had some level of formal education followed by Howrah (53%) and 24 Parganas(S) (41%).
- About 93% of the fisherfolk families were Hindus and more than 52% of the fishermen families belonged to either scheduled caste or scheduled tribe.
- Active fishermen constituted 26% of the marine fisherfolk population, of which 72% were full time fishers, 22% were part time fishers and the remaining 6% were occasionals. Most of the Howrah and Purba Midnapur fishermen were full timers, while part time and occasional fishermen were maximum in 24 Parganas(S) district.
- Nearly 21% of the fisherfolk earned their livelihood from allied activities like marketing, making/repairing nets, curing, peeling, labour and other fishery related activities. Most of the males were engaged in occupation such as labour (57%), repairing/making of nets (19%) and marketing (11%) while female involvement is higher in repairing/making of nets (43%), labour (19%) and curing (16%).
- 10% of the fisherfolk were having membership in co-operative societies out of which 80% have membership in fisheries co-operatives. Co-operative membership was maximum in Purba Midnapur district.

- Trawlers, gillnetters and dolnetters were the main craft of the mechanized sector and plank built boats and canoes were more in the artisanal sector. There are 18,646 craft **in the fishery** employed in marine fishing of which 6,829 were mechanized; 1,776 are motorized and the rest non-motorised. Gillnetters and Dolnetters (craft mainly used in the bagnet fishery) account for 89% of the mechanized craft. There were 610 mechanised trawlers of which 579 were in 24 Parganas(S).
- West Bengal marine fisherfolk **owned** 17,669 craft out of which 35% were mechanized, 9% were motorized and the remaining were non-motorised craft. The number of families having shares in fishing craft was maximum in Purba Midnapur and followed by 24 Parganas(s).
- Important gears of West Bengal were gill nets, fixed bagnets, trawl nets and hooks and lines. Sharing pattern is more visible in bagnets, shore seines and trawl nets.
- Nearly 49% of the fisherfolk families involved in fishing possess neither craft nor gear.
- Only 3% of the fisherfolk families were found to own some electronic gadgets/life saving equipment.
- In West Bengal, nearly 91% of the houses where marine fisherfolk families live were found to be kutcha and the maximum (93%) was in 24 Parganas(S).
- There were nearly 9 educational institutions in every 5 marine fishing villages mainly dominated by the primary schools. The maximum number was in the district of 24 Parganas(S).
- About 46% of the marine fishing villages were electrified and 29% were connected by road.
- There were only 38 ice factories located in the marine fishing villages of which 34 were in 24 Parganas(S).
